### **Summary [100-150 words]**

This is a short summary of major take-home lessons that readers should remember, based on the specific patient and case. It is roughly 100-150 words long.

- For numerous take-home lessons, create a bullet-point list instead.
- If appropriate, support with citations from the Reference List.

### **Acknowledgements [Optional]**

Thank you to Dr. Jane Doe for her review of the manuscript. Thank you also to the research group at College University Medical Center for their contribution.
